SUBCELLULAR LOCATION: Integral membrane protein.

SUBCELLULAR LOCATION: Integral membrane protein.

ALTERNATIVE PRODUCTS: 2 ISOPORMS; A LONG FORM (SHOWN HERE) AND A SHORT FORM; MAX BE PRODUCED BY ALTERNATIVE SPLICING.

TISSUE SPECIFITY: STRONGLY EXPRESSED IN BRAIN. ALSO DETECTED IN HEART. REDUCED EXPRESSION IS OBSERVED IN SOME GLIOBLASTOMA CELL
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                ж

--- SUBCELLULAR LOCATION: Integral membrane protein.
--- TISSUE SPECIFICITY: WIDE EXPRESSION; INCREASED LEVELS IN PERIPHERAL BLOOD MONONUCLEAR CELLS.
---- PTM: N-AND O-GLYCOSYLATED; (POSSIBLE).
--- SIMILARITY: COUPLING EGF-LIKE DOMAINS.
--- SIMILARITY: BELONGS TO FAMILY 2 OF G-PROTEIN COUPLED RECEPTORS.
--- SIMILARITY: CONTAINS I GPS DOMAIN.

"Identification of a novel murine receptor for corticotropin-releasing hormone expressed in the heart.";
Mol. Endocrinol. 9:637-645(1955).
-! FUNCTION: THIS IS A RECEPTOR FOR CORTICOTROPIN RELEASING FACTOR.
SHOWS HIGH-AFPINITY CRF BINDING: THE ACTIVITY OF THIS RECEPTOR IS MEDIATED BY G PROPEINS WHICH ACTIVATE ADENYLYL CYCLASE.
-! SUBCELLULAR LOCATION: Integral membrane protein.
-! TISSUE SPECIFICITY: HIGHLY EXPRESSED IN THE HEART. ALSO EXPRESSED
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       GASTROINTESTINAL TRACT, EPIDIDYMIS, AND

FEBS Lett. 335:1-5(1993).
-!- FUNCTION: THIS IS A RECEPTOR FOR CORTICOTROPIN RELEASING FACTOR.
SHOWS HIGH-AFFINITY CFE BINDING. THE ACTIVITY OF THIS RECEPTOR IS
MEDIATED BY G PROTEINS WHICH ACTIVATE ADENYLYL CYCLASE.
-!- SUBCELLULAR LOCATION: Integral membrane protein.
-!- TISSUE SPECIFICITY: BRAIN, PITULTARY GLAND, TESTIS. NOT DETECTED
IN PLACENTA, PERIPHERAL BLOOD, LYMPHOCYTES, KIDNEY AND LIVER.
-!- TIM: CARBOXYL-TERMINAL SER OR THR RESIDUES MAY BE PHOSPHORYLATED.
-!- SIMILARITY: BELONGS TO FAMILY 2 OF G-PROTEIN COUPLED RECEPTORS.

Proc. Natl. Acad. Sci. U.S.A. 92:5759-5759(1995).
-!- FUNCTION: THIS IS A RECEPTOR FOR CORTICOTROPIN RELEASING FACTOR.
SHOWS HIGH-AFFINITY CRF BINDING. THE ACTIVITY OF THIS RECEPTOR IS
MEDIATED BY G PROTEINS WHICH ACTIVATE ADENYLYL CYCLASE. THE RANK
ORDER OF POTENCY FOR THE RECEPTOR IS SAUVAGINE > UROTENSIN >-
RAT/HUMAN CRF > OVINE CRF.

ALTERNATIVE PRODUCIS: 2 ISOFORMS: CRE2-ALPHA (SHOWN HERE) AND
CRE2-BERPA, ARE PRODUCED BY ALTERNATIVE SPLICING. CRE2-ALPHA
APPEARS TO BE THE PREDOMINANT FORM.

TISSUE SPECIFICITY: PREDOMINANTLY EXPRESSED IN LIMBIC REGIONS OF
THE BRAIN SUCH AS THE LAPERAL SEPTUM, THE ENTORHINAL CORTEX, THE
HYPOTHALAMIC VENTROMEDIAL NUCLEUS AND SEVERAL AMYGDALOID NUCLEI.
ALSO DETECTABLE IN LUNG, KIDNEY AND HEART.

SIMILARITY: BELONGS TO FAMILY 2 OF G-PROTEIN COUPLED RECEPTORS.

Traal-Morris C., Amcaber of the rat corticotropin releasing factor receptor. A member of the class 11 G protein-coupled receptors.";

-1. Function: THIS IS A RECEPTOR FOR CORTICOTROPIN RELEASING FACTOR. SHOWS HIGH AFFINITY CRP BINDING. THE ACTIVITY OF THIS RECEPTOR IS MEDIATED BY G PROTEINS WHICH ACTIVATE ADENVITY. CYCLASE.

-1. SUBCELLULAR LOCATION: Integral membrane protein.

-1. TISSUE SPECIFICITY: ENTIRE NEWOUS SYSTEM.

-1. PTHN: CARBOXYL-TERMINAL SER OR THR RESIDUES MAY BE PHOSPHORYLATED.

-1. PTM: CARBOXYL-TERMINAL SER OR THR RESIDUES MAY BE PHOSPHORYLATED.

-1. PTM: CARBOXYL-TERMINAL SER OR THR RESIDUES MAY BE PHOSPHORYLATED.

-1. PTM: SIMILARITY: BELONGS TO FAMILY 2 OF G-PROTEIN COUPLED RECEPTORS.

spliced variant of the type 1 corticotropin-releasing hormone with a deletion in the seventh transmembrane domain present
                                                                                                                                                                                                                                                                                             CRF-R1
                                                             in the humah pregnant term myometrium and fetal membranes.";
Mol. Endocrinol. 13:2189-2202(1999).
-!- FUNCTION: THIS IS A RECEPTOR FOR CORTICOTROPIN RELEASING FACTOR.
SHOWS HIGH-AFFINITY CFF BINDING. THE ACTIVITY OF THIS RECEPTOR IS
MEDIATED BY G PROTEINS WHICH ACTIVATE ADENYLYL CYCLASE.
                                                                                                                                                                                                                                                                                                                                                WITH A HIGH AFFINITY.

TISSUE SPECIFICITY: PREDOMINANTLY EXPRESSED IN THE CEREBELLUM, PITUITARY, CEREBELLUM, EXPRESSED IN THE CEREBELLUM, PITUITARY, CEREBRAL CORTEX AND OLFACTORY LOBE.

PTM: CARBOXYL-TERMINAL SER OF THR RESIDUES MAY BE PHOSPHORYLATED. SIMILARITY: BELONGS TO FAMILY 2 OF G-PROTEIN COUPLED RECEPTORS.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   CORTICOTROPIN RELEASING FACTOR RECEPTOR
